TALBUK IS THE NEW CAFFERIE BUT TRWD IS NOT THE NEW FWD

CHOPPERTOWN: THE SINNERS

FROM: One World Studios, www.choppertown.com

PRICE: \$24.95

RATING: NR

HOT: For the chopper scene, this is the real underground.

NOT: Cars? What cars?

RATING:  1/2

Everyone seems to love motorcycles, especially custom motorcycles. Just like the tuner world, there are some pretty big gaps and differences in the way people are building choppers. *Choppertown* is a freaking awesome video that follows a group called the Sinners, and documents what real chopper building is all about. These guys represent what we would call the street scene or JDM market within the tuner market. You will understand very well the difference between the typical big bulky billet choppers that infiltrate the show scene of the bike world and the real deal street cred choppers that the Sinners are pumping out. - AW
